

07 Must-visit websites for developers

Swipe to find out!!

Hey Everyone :)

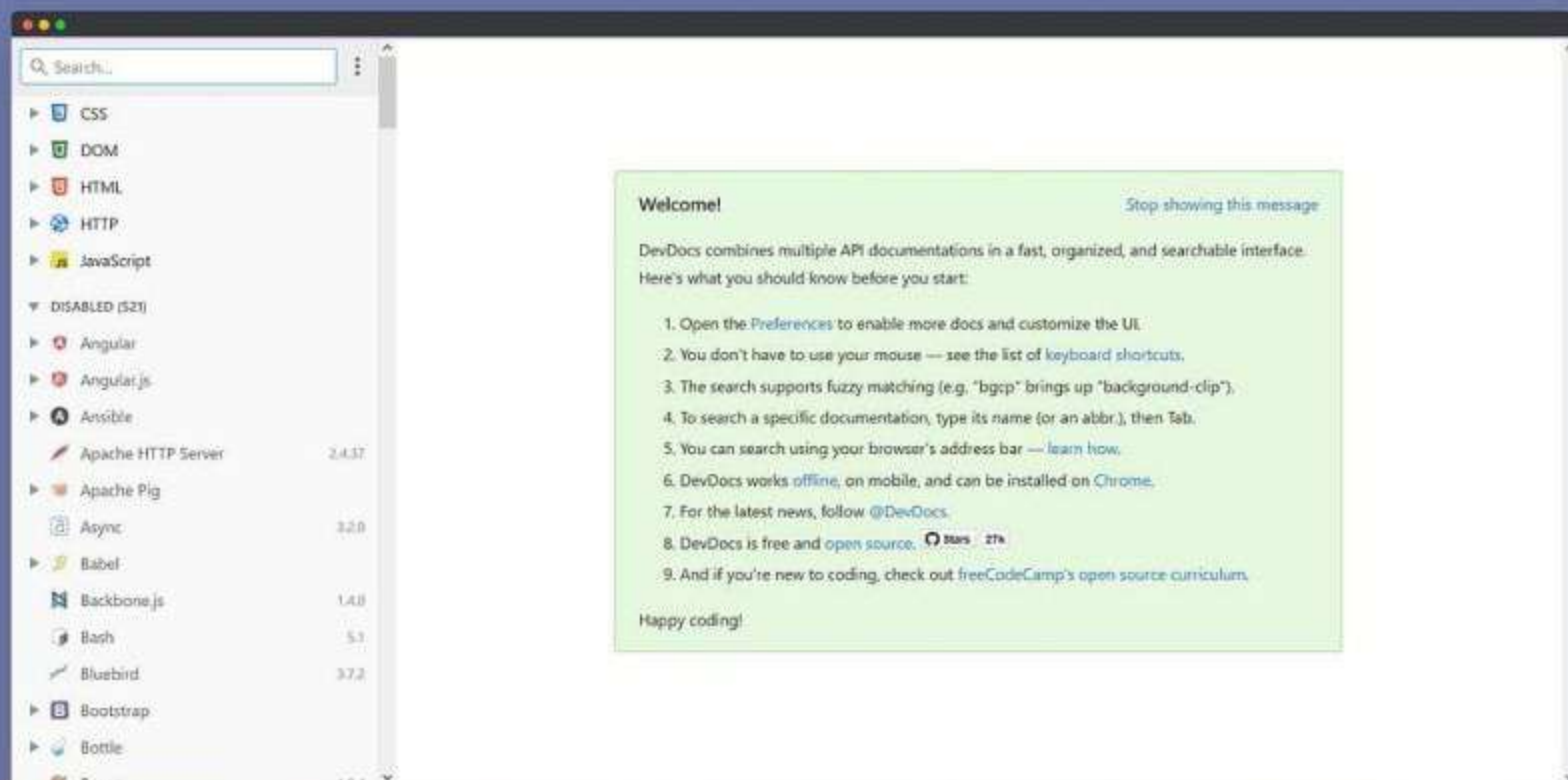

There are so many websites to make the work of developers easier.

Everyone doesn't know all. In this post, we will see 07 Must-Visit Killer Websites For Developers.

Also you can join our Telegram channel for Source codes and for more!!

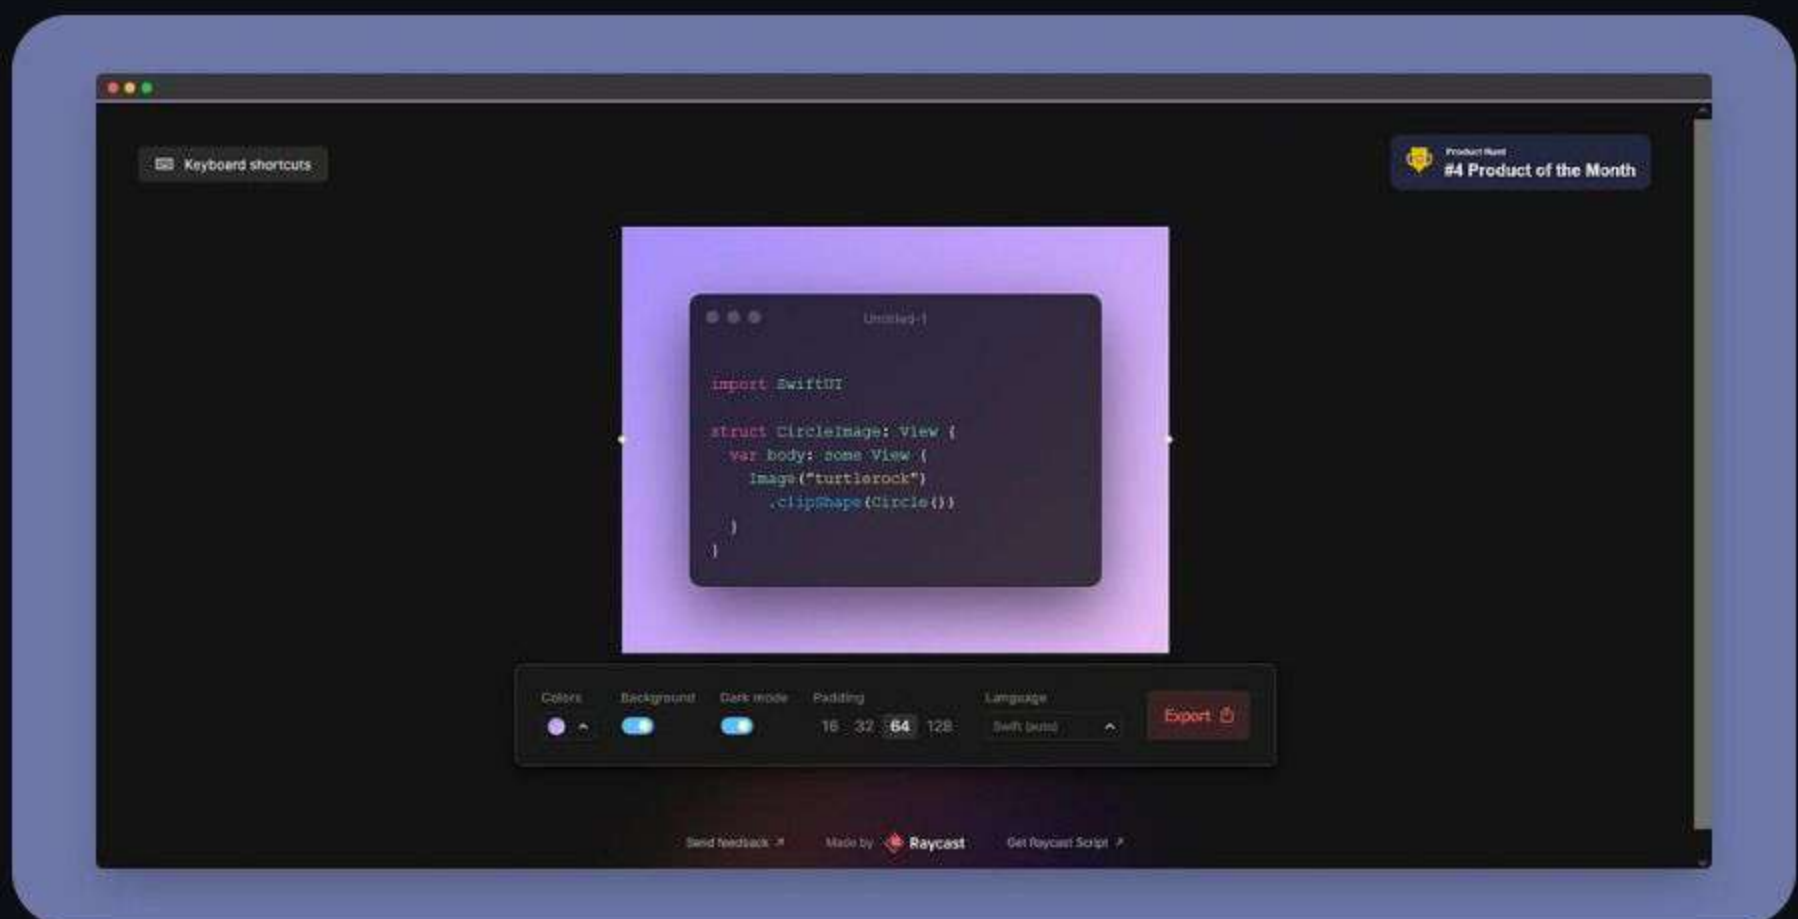

1. DevDocs

DevDocs brings together numerous API documentation in a single, searchable interface. You will find docs related to various programming languages, technologies in one place.

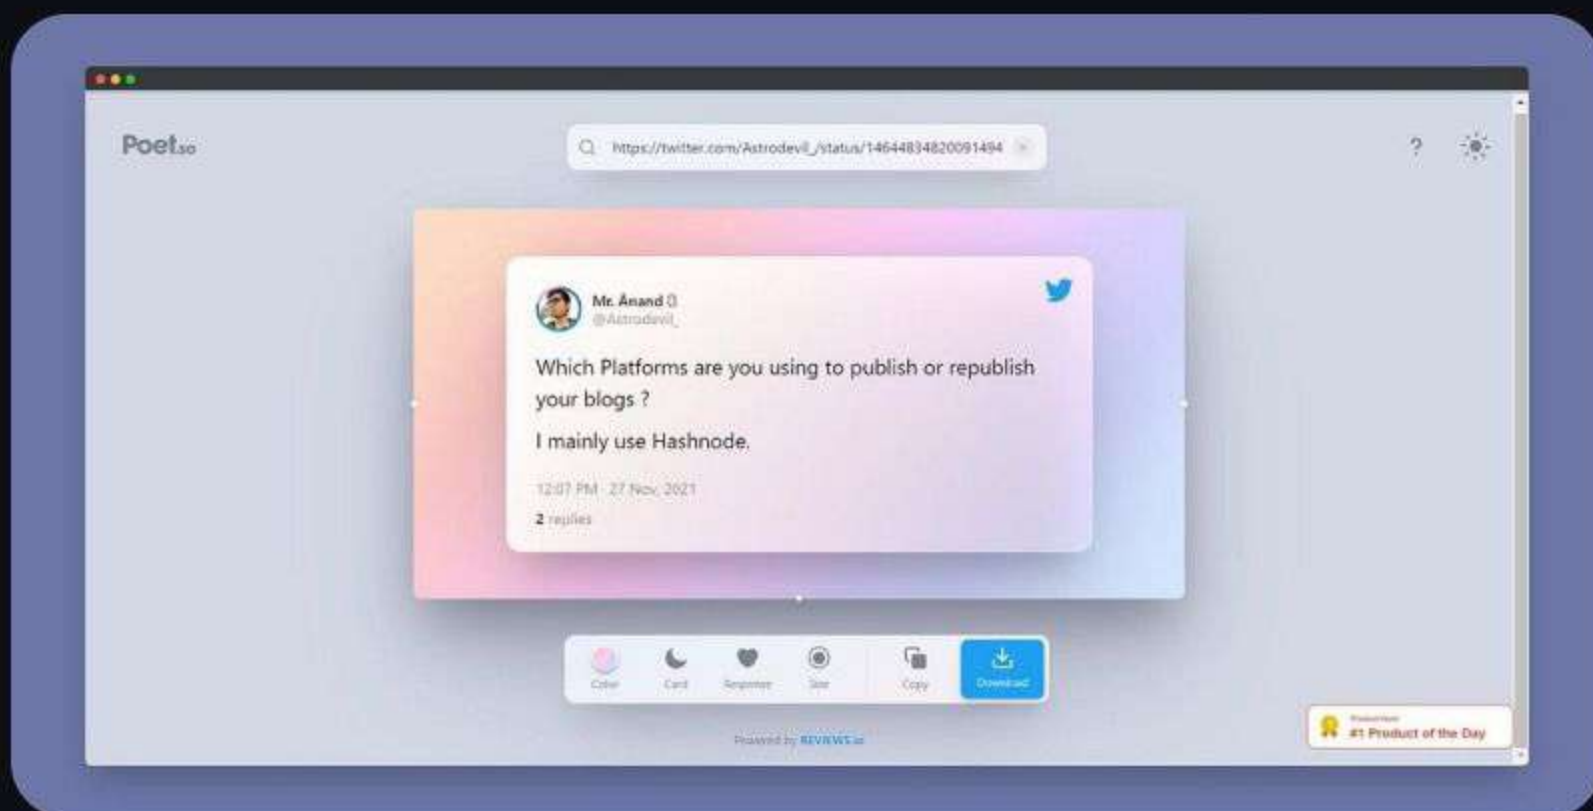

2. ray.so

This website allows you to take beautiful screenshots of codes. It also has a dark mode and some preloaded themes for different programming languages. You can also use its VS Code extension.

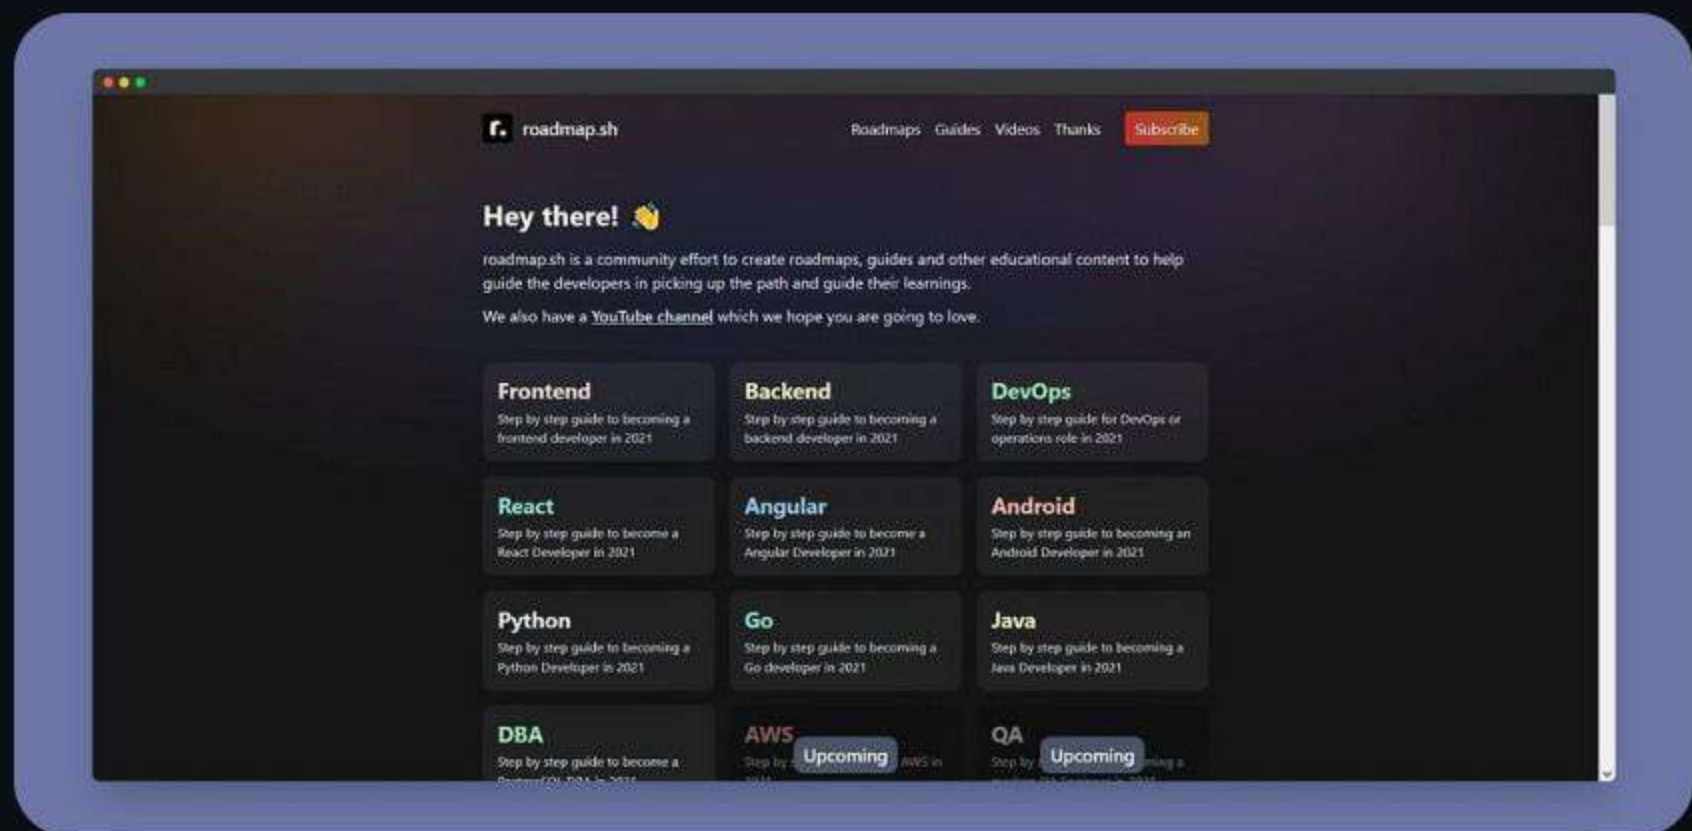

3. Poet.so

This site is useful for developers who wish to post photos of their tweets on social media. Website transforms your tweet into a beautiful and editable design.

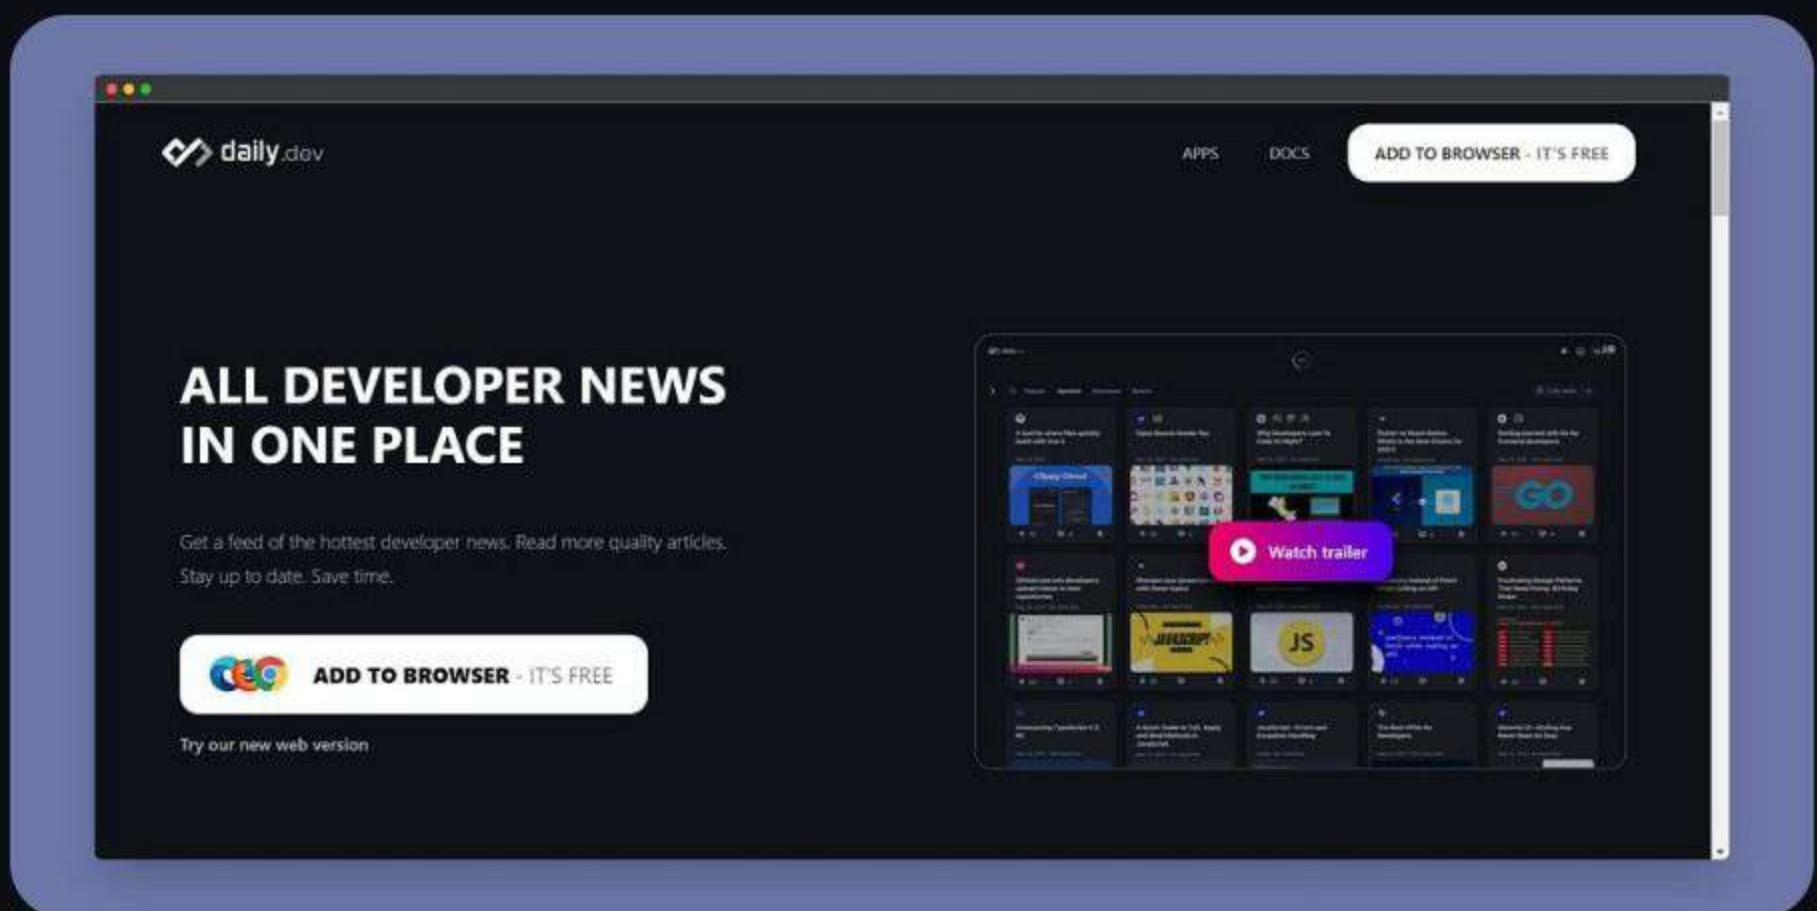

4. roadmap.sh

This website provides roadmaps, guidelines, and other educational content to assist developers in choosing a path and directing their learning. It is very helpful for a beginner as well as a learner who needs guidance.

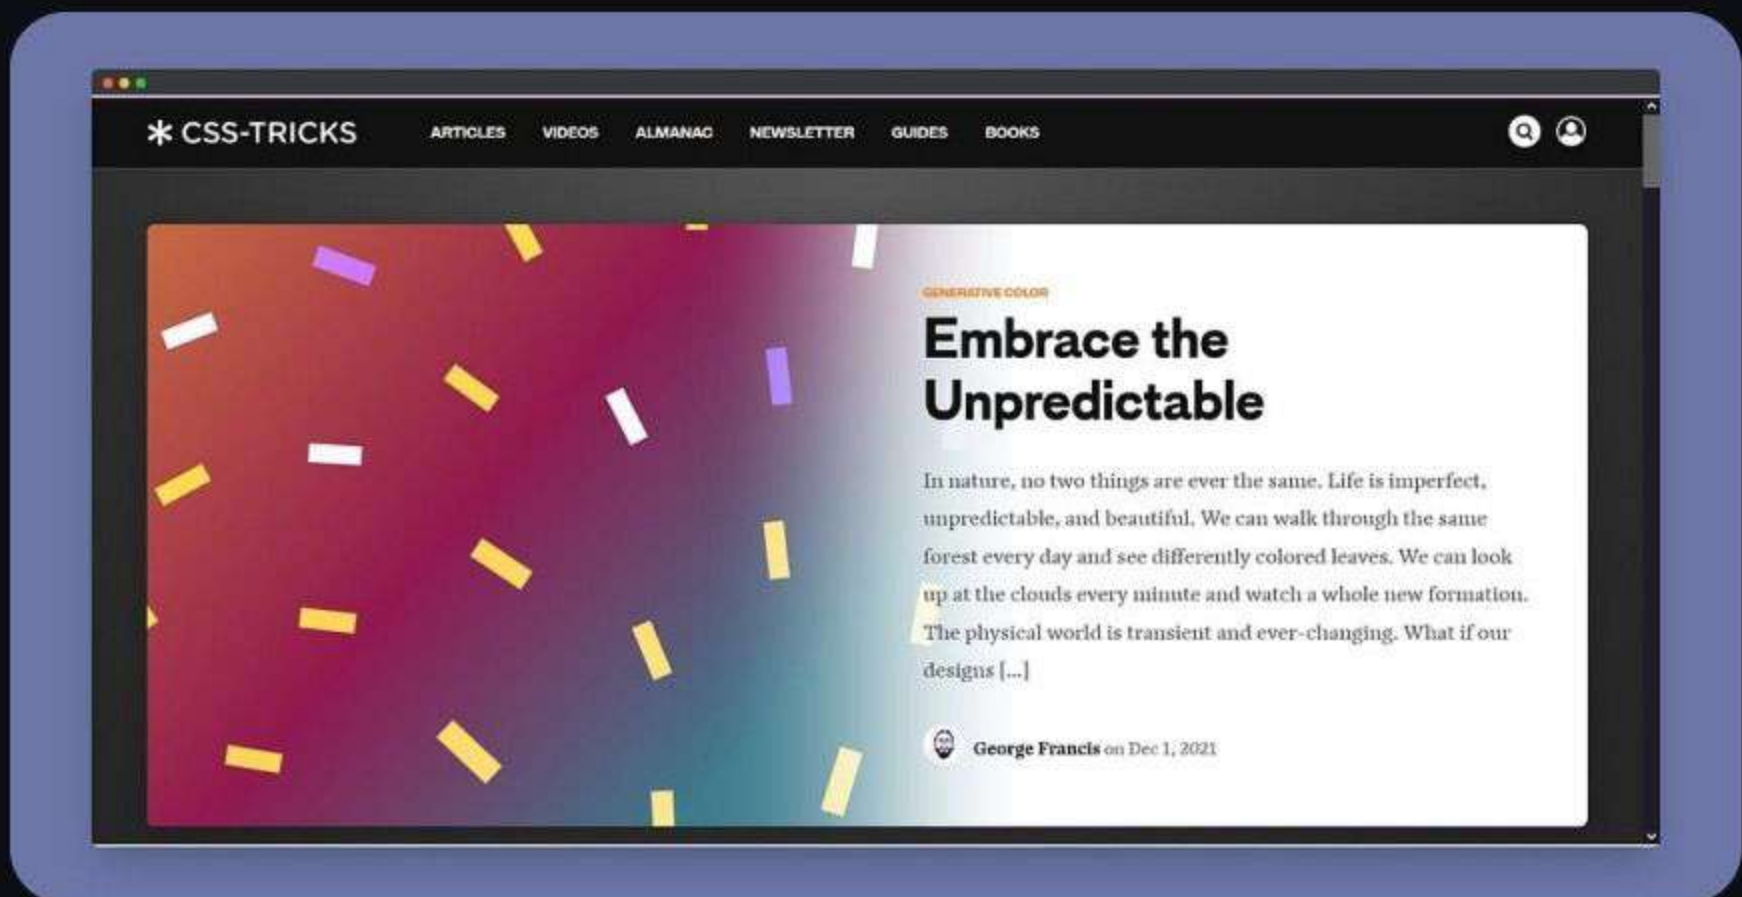

5. daily.dev

It is a platform where you can find so many good articles to read daily. It shows the best articles from various platforms directly in your feed. Stay updated with quality content from various platforms directly into your browser by using its extension.

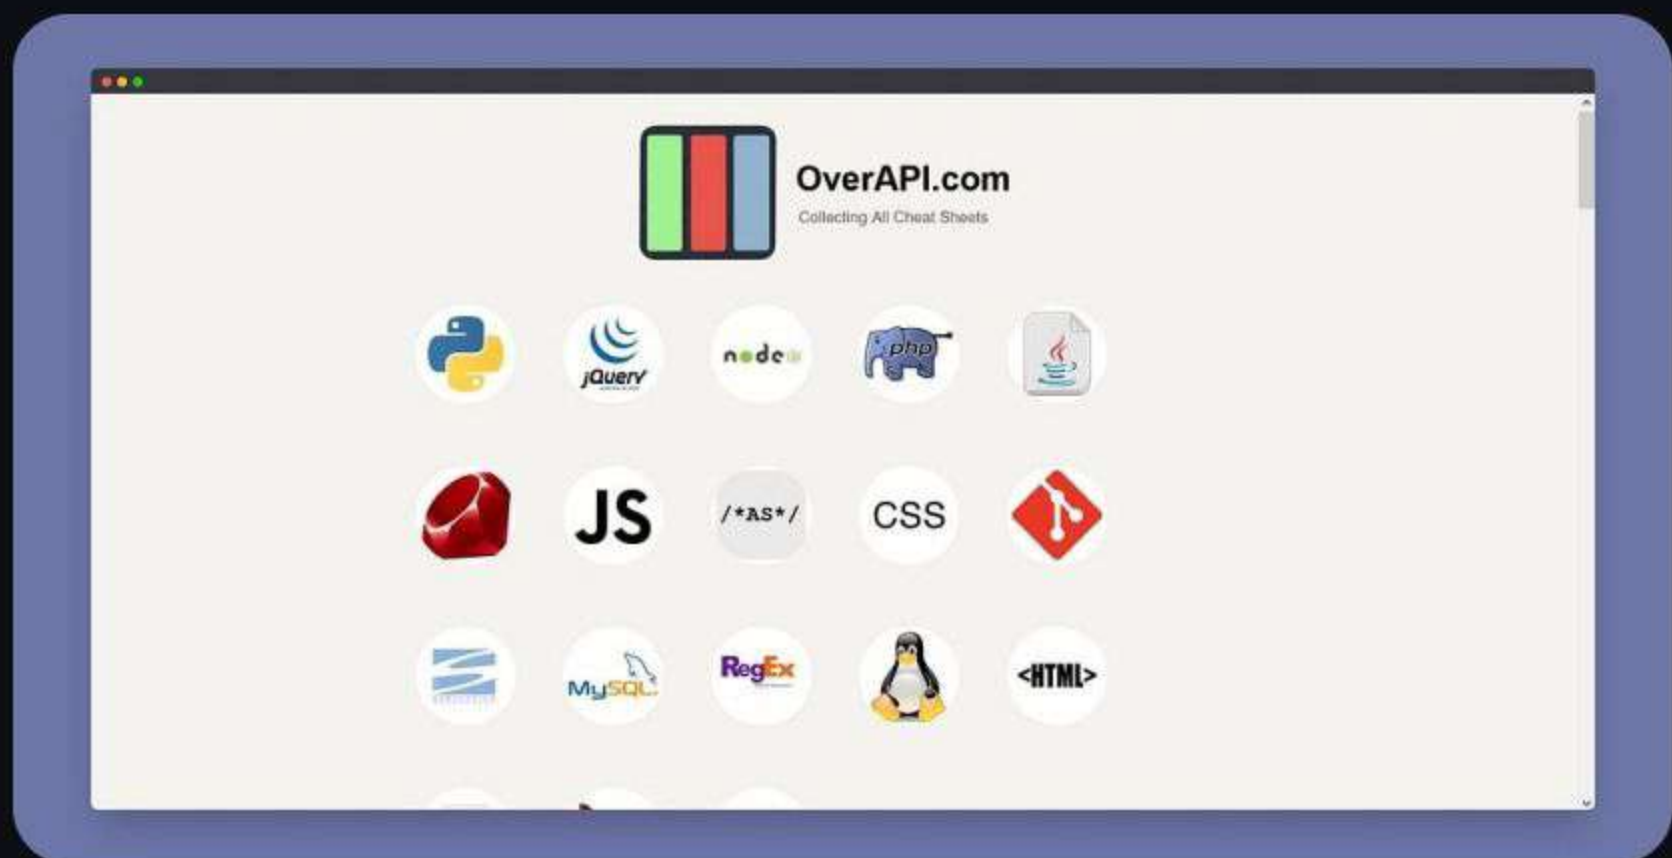

6. CSS-TRICKS

You can master your web development skills by learning every basics about CSS from this website. If you didn't already know, CSS is what makes pages on the web look beautiful.

7. overAPI

For all developers, OverAPI is one of the most beautiful and useful websites. This website has cheatsheets for the majority of programming languages. Take a look at it right now.

Thanks for Reading :)
